

1 Disconnect the white tubing from the inlet quick-fitting on the membrane housing cap. Unscrew the cap.

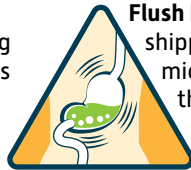

2 Remove the membrane from this bag. Avoid skin contact with the membrane. Insert end with two black o-rings first. Push firmly to ensure seal.

3 Check that the O-ring is fitted on the membrane housing. Screw on the housing cap. Use the small housing wrench to tighten about a half-turn. Do not overtighten.

WARNING:
Read owner's
manual for more
information

Avoid skin contact.
Use this plastic bag
or sanitary gloves
to handle
membrane.

Flush before drinking! This element is
shipped in a solution that provides
microbiological protection. Flush
through one full tank before drinking.
Un-flushed water may cause
gastrointestinal discomfort.

Do NOT splash into eyes!
If membrane solution splashes
into eyes during installation,
flush eyes immediately with
water. If eye pain persists,
seek medical attention.

Keep Wet after initial use.
If membrane has not been used for
more than a week, flush the first 5
gallons. If system is not going to be
used for more than 7 days, remove
and refrigerate membrane.
